

IDEAWEAVE

Date: 04/09/2023

Guide: Binumon Joseph

1. Project Overview?

IdeaWeave is a user-centric content management system with a strong emphasis on content distribution and user engagement. It comprises four key modules, including Admin, Readers, Writers, and Reviewers, each fulfilling distinct roles in the platform's ecosystem. Admins maintain the system's integrity and oversee its structure, while Readers enjoy personalized recommendations, earn credits, and engage with content. Writers benefit from incentives like royalties and content promotion, while Reviewers ensure the quality of submitted works. The system offers a wide range of functionalities, from user registration to content creation and recommendation optimization, all built on a robust technical foundation using React.js for the front-end and Node.js for the back-end. IdeaWeave aims to empower creators and provide readers with a dynamic and rewarding content consumption experience.

2. To what extend the system is proposed for?

IdeaWeave system is designed comprehensively to serve the needs of content creators and consumers within its defined scope. It offers a wide range of features and functionalities that cover various aspects of content management, distribution, and user engagement. IdeaWeave is well-equipped to serve as a content management platform for writers and readers, with tools for content creation, distribution, and engagement. It includes mechanisms for user incentives, content recommendations, and even a credit system to promote user retention.

3. Specify the Viewers/Public which is to be involved in the System?

Content creators (Writers and Reviewers) and Content consumers (Readers)

4. List the Modules included in your System?

User and profile management, Search and recommendation, Credit management, Forum, Comments and reviews, library, translation, read history and time tracking, content creation and review.

5. Identify the users in your project?

Admin, Reader, Writer and Reviewer

6. Who owns the system?

Administrator

7. System is related to which firm/industry/organization?

Digital Content industry, publishing companies

8. Details of person that you have contacted for data collection?

Online Resources, Personal experience using similar websites such as Webnovels and WordPress

9. Questionnaire to collect details about the project?

i. What is the primary goal of the IdeaWeave project?

The primary goal of the IdeaWeave project is to create a user-friendly content management system that emphasizes content distribution and user retention through dynamic recommendation and a credit system. It aims to empower creators to reach their target audience effectively.

ii. What are the key modules in IdeaWeave?

The key modules in IdeaWeave are Admin, Users (consisting of Readers, Writers, and Reviewers).

iii. What are the key elements of the user experience you want to prioritize?

- a. Admins will have the responsibility to manage user accounts, moderate content, oversee platform organization, and ensure smooth operation.
- b. Readers will enjoy a personalized reading experience, access to a variety of content, and the ability to suggest tags and engage with the community.
- c. Writers will create high-quality content, earn royalties, promote their work, and have opportunities for growth and creativity.
- d. Reviewers will review and proofread content, receive compensation, and have opportunities for advancement.

iv. Could you provide more details about the monetization strategy, including how users can earn and use credits, and how the e-commerce aspect will work?

Users can earn credits through read time, daily check-ins, and viewing advertisements, which they can use for subscriptions, merchandise, or to support their favourite writers. E-commerce will allow writers to add merchandise to the store for additional revenue generation.

v. What measures will be implemented to ensure the security of user data and content?

Data security measures will include encryption, secure user authentication, and regular security audits. We will comply with data privacy regulations and ensure user consent for data usage. Moreover, specific access limit is given to prevent infringement.

- vi. Are there any legal or regulatory considerations related to content publishing or user interactions that need to be addressed?

We will adhere to copyright and content publishing laws, and we will implement mechanisms to report and address any legal concerns.

- vii. Do you have a specific timeline or target launch date for the project?

We will adhere to a weekly progress milestone which will be reviewed by our mentor.

- viii. How can Reviewers contribute to the content review process in IdeaWeave?

Reviewers can review content, highlight corrections, suggest categories and tags, and play a role in ensuring the quality and accuracy of published works.

- ix. What is the significance of the credit system in IdeaWeave?

The credit system in IdeaWeave plays a central role in incentivizing and rewarding user engagement, including reading, reviewing, and content creation. Credits can be used for various purposes, such as discounts, advertising, and upgrading user ranks.

- x. What is the significance of the credit system in IdeaWeave?

The credit system in IdeaWeave plays a central role in incentivizing and rewarding user engagement, including reading, reviewing, and content creation. Credits can be used for various purposes, such as discounts, advertising, and upgrading user ranks.

- xi. What is the significance of the credit system in IdeaWeave?

The credit system in IdeaWeave plays a central role in incentivizing and rewarding user engagement, including reading, reviewing, and content creation. Credits can be used for various purposes, such as discounts, advertising, and upgrading user ranks.
