

## Table Design

User Collection	
Key	Value
_id	MongoDB generated ObjectID
username	String
email	String
password	String (hashed)
role	String ("Admin," "Reader," "Writer," or "Reviewer")
Other fields	User-specific fields

Content Collection	
Key	Value
_id	MongoDB generated ObjectID
title	String
content	String or reference to content storage
author	Reference to Users Collection
category	String
tags	Array of Strings
publication_date	Date
status	String ("Draft," "Published," "Under Review," etc.)

### Credits Collection:

Credit Collection	
Key	Value
_id	MongoDB generated ObjectID
user	Reference to Users Collection
amount	Number
source	String ("Read Time," "Daily Check-in," "Advertisement," etc.)

Recommendation Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>recommended_content</b>	Array of references to Content Collection

Comments Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>content</b>	Reference to Content Collection
<b>text</b>	String
<b>timestamp</b>	Date

#### Reviewers Collection:

Reviewers Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>rank</b>	String or Number
<b>earnings</b>	Number
<b>reviewed_content</b>	Array of references to Content Collection

Store Item Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>item_name</b>	String
<b>description</b>	String
<b>price</b>	Number
<b>availability</b>	Boolean

Achievement Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>achievement_name</b>	String
<b>timestamp</b>	Date

Notification Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>message</b>	String
<b>timestamp</b>	Date

Forum Posts Collection	
Key	Value
<b>_id</b>	MongoDB generated ObjectID
<b>user</b>	Reference to Users Collection
<b>title</b>	String
<b>content</b>	String
<b>timestamp</b>	Date
